Performance figures shown on this factsheet are net of underlying fund charges but gross of Brooks Macdonald and professional adviser management fees. Deduction of these fees will impact on the performance shown. Prior to July 2012, returns are representative performance data from DPZ Capital Limited* portfolios managed on the Skandia Investment Solutions platform. Please note that performance figures of less than one year are not annualised.

*Managed at the relevant time by DPZ Capital Limited, which merged with Brooks Macdonald on 02.12.15.

**Represents the ARC Steady Growth PCI GBP Index. Benchmarks are provided by Asset Risk Consultants. Returns for the last three months may represent estimates only.

*** Represents the MPI GBP medium risk index from 01.12.2009. Returns for the last three months may represent estimates only.

**** Data shown is since launch on 01.06.2009

Overview

A medium risk, balanced portfolio structured to provide some capital growth, without full equity market volatility. Investments will be weighted towards growth assets, such as equities and property, with a lower weighting to stable investments such as fixed interest securities. Equity exposure is expected to range between 55-75%. The recommended investment time frame for this strategy is in excess of five years. Long-term returns are targeted to exceed inflation by 3% per annum.

Key Facts

Launch date	01.06.2009
Currencies available	£,\$,€
Number of holdings	26
Minimum investment	£100,000

Important information

All data provided by Brooks Macdonald, unless otherwise stated, as at 30/09/2020. The information presented in this factsheet, including charges and performance, is for the Sterling portfolio. Other currencies may be available. Investment markets and conditions can change rapidly and as such the views expressed should not be taken as statements of fact, nor should reliance be placed on these views when making investment decisions. The price of assets in this portfolio and the income from them can go down as well as up and neither is guaranteed. Past performance is not a guide to the future. Investors may not get back the amount invested. Changes in rates of exchange may have an adverse effect on the value, price or income of an investment. Changes in interest rates may impact the value of fixed interest investments within the portfolio. The value of your investment may be impacted if underlying fixed interest holdings default, or market perception of their credit risk changes.
